## **Application Administration for Multimedia Systems:**

**Kaltura (UCO On Demand):** UCO On Demand is a media management and content delivery system, hosted by Kaltura, for higher education that provides a means for managing, delivering, creating, and accessing university-related media content. The solution is designed for academic purposes.

**Enterprise Web Conferencing Services:** UCO Zoom is the web, audio and video conferencing system at UCO. It offers the ability to create online virtual meetings via the web using audio and video conferencing hosted service all supported via mobile devices, desktops, and room systems.

**Enterprise Digital Signage:** Across the university, many buildings offer digital signage options to promote university-related information, events, programs and initiatives, for faculty, staff and students utilizing Samsung's Magic Info application.

**Q-SYS Reflect Enterprise Manager:** Application monitoring and support of AV devices across classrooms, conference rooms and meeting spaces.

**CVENT:** The University of Central Oklahoma has adopted **CVENT** as the official cloud-based solution for large in person and virtual (Hybrid) conferences and events.

**Campus Explorer:** Campus Explorer is a wayfinding and asset inventory tool to monitor AV technology installed across all campus and off campus locations.
